Indoor Furniture Care Guide

Your furniture has been handcrafted in our Southern Highlands workshop from carefully selected Australian hardwoods and finished with Osmo Polyx® Hardwax Oil. With simple care, your furniture will continue to develop the warmth and character that only natural timber can provide.

Everyday Care

Dust regularly with a soft dry or slightly damp cloth. Wipe spills promptly and avoid abrasive cleaners, harsh chemicals and silicone-based polishes.

Placement

Avoid prolonged exposure to direct sunlight, fireplaces, heaters and air-conditioning vents. Use felt pads where appropriate to protect both furniture and flooring.

Osmo Finish

Osmo Polyx® Hardwax Oil protects the timber while preserving its natural feel. Over many years of use the finish can be refreshed without stripping the timber. Contact Mossy Store if you would like advice.

Upholstery

Vacuum upholstered furniture regularly using a soft brush attachment. Blot spills promptly with a clean absorbent cloth. For stubborn stains, consult a professional upholstery cleaner.

Natural Timber

Variations in grain, colour and texture are natural features of solid timber. Minor seasonal movement may occur as humidity changes and is a normal characteristic of handcrafted furniture.

Sustainability

We build furniture to be enjoyed for decades, not replaced after a few years. We believe good furniture should gather stories, not end up in landfill.
